

Case Study

Project: Cartersfield Road
Client: Qualis Commercial
Location: Waltham Abbey EN9 1JD
Project Summary: Asbestos Removal & Demo
Contract Duration: 14 Weeks
Contract Value: £450,000

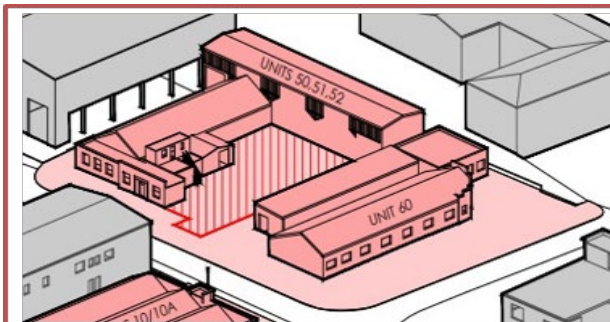

Projects Details

Pier Contractors Limited were appointed as Principal Contractor to complete the project in accordance with the latest CDM and Control of Asbestos Regulations.

The Challenges

The demolition of Units 50, 51, 52 & 60 Cartersfield Road had to be carried out carefully due to the volume of known notifiable & non-notifiable Asbestos materials that were present. Further asbestos cement & AIB was discovered during excavation works which required remediation with controlled measures.

Client Testimonial

We were extremely pleased with the works undertaken by Pier on the asbestos removal and demolition works on our new Waltham Connect development at Cartersfield Road. There was direct, open and continued contact with Pier from conception to completion.

The site was excellently managed, secure and safe at all times. The experience of all individuals in their relevant disciplines is clear with a proactive approach to resolving any onsite challenges.

The weekly updates and two weekly reporting was very clear and concise. Any onsite unknowns and additional items of work were identified straight away, and the process managed openly.

We would definitely work with Pier again.
