Case Study

Project: Goldsmiths Hall

Location: London

Project Summary: Asbestos Removal

Contract Duration:

Contract Value: £150,000 +

Projects Details

Goldsmiths' Hall is a Grade I listed building at the junction of Foster Lane and Gresham Street in the City of London. It has served as an assay office and the headquarters of London's goldsmith guild, the Worshipful Company of Goldsmiths, one of the livery companies of the City of London.

Our works involved Environmental clean of roof void, removal of AIB & encapsulation of AIB throughout various locations of this prestigious heritage building.

Challenges

The main challenge for Pier Contractors Ltd was to insure that we completed the works within the agreed programme timescale, this was achieved and ministered by several comprehensive site meetings with all relevant parties involved with this project. The other major challenges was working in an occupied property.

Interior Fit Out & Refurbishment, Enabling Works, Structure Alterations, Demolition / Soft Strip
