

Pier Contractors Carbon Reduction Plan

Bidder name: Pier Contractors Limited

Publication date: 28th August 2025

Commitment to achieving Net Zero

Pier Contractors Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline Year: 2023	
Additional Details relating to the Baseline Emissions calculations.	
Pier Contractors Limited engaged a professional carbon accounting and decarbonisation specialist, Auditel, to help accurately report all required emissions based on activity data. That is a process which has highlighted gaps in some historic data which is being rectified. All Scope 1 & 2 calculations use evidenced actual data of either volumetric measures (litres consumed of fuel in vehicles/kg of LPG) or kWh in the case of electricity supply. The absence of data in year 1 meant estimates have been used to report most Scope 3 emissions at this stage while better supplier engagement is achieved, and data quality is improved.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	160.9346
Scope 2	2.6949
Scope 3 (Included Sources)	3.3 FERA – 39.92 3.4 Upstream Transport & Distribution – 48.00 (est) 3.5 Waste – 0.8079 3.6 Business Travel – 0 3.7 Employee Commuting – 5.00 (est) 3.9 Downstream Transport & Distribution – 50.00 (est)

	Total Scope 3 – 143.7279 tCO₂e
Total Emissions	307.3574 tCO₂e

Current Emissions Reporting

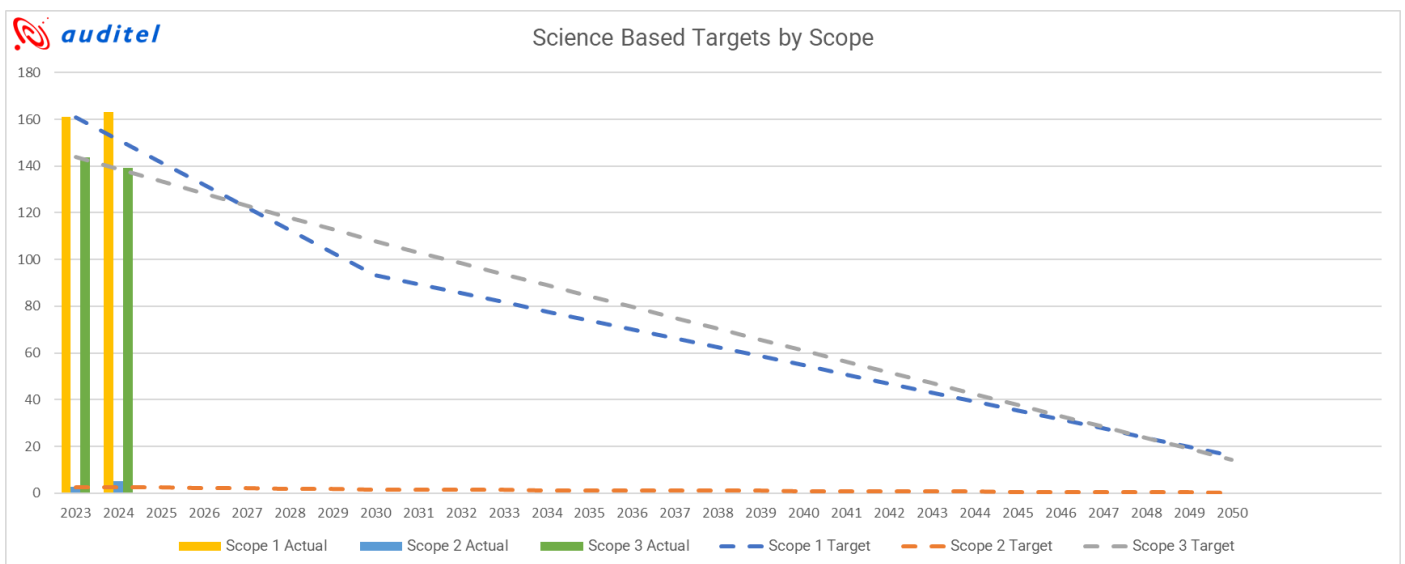

Reporting Year: 2024	
Additional Details relating to the Current year Emissions calculations.	
Pier Contractors Limited continue to work with a professional carbon accounting and decarbonisation specialist, Auditel, to help accurately report all required emissions based on activity data. That is a process rectified many of the historic gaps in data. Therefore year 2 reporting contains accurate and verified emission report for Scopes 1, 2, 3.3, 3.5, 3.6 and 3.7. However, absence of data for 3.4 meant estimates have been used to report 3.4 emissions at this stage while better supplier engagement is achieved, and data quality is improved.	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	162.89
Scope 2	5.24
Scope 3 (Included Sources)	3.3 FERA – 41.12 3.4 Upstream Transport & Distribution – 48.00 (est) 3.5 Waste – 3.16 3.6 Business Travel – 36.94 3.7 Employee Commuting – 9.85 Total Scope 3 – 139.07 tCO₂e
Total Emissions	307.2 tCO₂e

Progress against the original targets can be seen in the graph below, albeit still very early in the Net Zero Journey. Net Zero carbon reduction targets can be seen below based upon an absolute reduction cross sector pathway from Science Based Targets.

SBT Reduction Targets by Scope

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

Peir Contractors Limited have undertaken a number of historic environmental projects across the business. We cannot measure and report the impact of those projects as our baseline has only been set from 2023. The carbon emission reduction targeted by these schemes equate to 15 tCO₂e, a 5%ge reduction against the 2023 baseline and the measures will be in effect when performing the contract

These historic measures include:

- Ensuring we source the most fuel-efficient vehicles on purchase
- Better staff awareness on environmental matters
- Optimising waste management & recycling

In the future we hope to implement further measures such as:

- *The introduction of a cycle to work scheme to lower commuter emissions.*
- *Electric and Hybrid vehicles to lower Scope 1 – mobile combustion emissions.*
- *Improved route planning for delivery of hire equipment on site to lower upstream transport and distribution emissions.*

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
